PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/517,883	Applicant(s) TITTMANN, MICHAEL	
	Examiner ATIF H. CHAUDRY	Art Unit 3753	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 07 August 2009.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-3 and 5-9 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-3 and 5-9 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 13 December 2004 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Status of the claims

Applicant's amendment as filed on 08/07/09 has been entered. The amendment claim

1. Currently claims 1-3, 5-9 are pending in this application.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3, 5-7 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sinz (US Patent 6276342) in view of Coha (US Patent 6553973).
3. Regarding claims 1 and 2, Sinz (fig. 1) discloses a fuel supply system for feeding fuel from a fuel tank 1 to an internal combustion engine 7 of a motor vehicle with a plurality of feed units 2, 3 arranged in the fuel tank 1, in which the feed units each have a surge chamber 9, 10 for collecting fuel and jet pumps 23, 24 for filling opposite surge chambers. Sinz fails to disclose a suction of a jet pump provided for filling a first surge chamber arranged in a second chamber. Coha (fig 1) teaches a fuel supply system comprising a saddle fuel tank and a plurality of surge chambers 69, 79 with the surge chamber 71 being fed by a suction line 74 connected to a jet pump 68 located inside a second surge chamber 69. It would have been obvious to a person having ordinary skill in the art at the time of the invention to have provided the fuel system disclosed by Sinz with a jet pump suction inside the surge chamber as taught by Coha in order to balance

Art Unit: 3753

the fuel level in the two chambers. Sinz discloses the fuel jet pumps at a minimum designated height in the tanks and it have been obvious that when placed inside the surge tanks the suction inlet of the jet pumps would be at a designated minimum height in the surge tanks. Moreover, all jet pumps stop pumping fluid when the filling level drops below the suction inlet of the jet pump.

4. Regarding claim 3, Sinz discloses both sides of fuel tank and the surge chambers of identical size and shape; therefore it would be obvious to use the jet pumps having same capacity.

5. Regarding claim 5, Sinz (fig. 1) discloses the jet pumps 23, 24 having individual feed lines.

6. Regarding claims 6 and 7, Sinz (fig. 2) discloses the jet pumps 23, 24 interconnected with a common collecting line 27 wherein the collecting line 27 for each of the surge chambers 9, 10 in each case has an inflow connected to the suction jet pump 23,24 and an outflow 28, 29 connected to the surge chamber 9,10.

7. Regarding claim 9, Sinz (fig. 2) discloses the jet pumps 23, 24, such that working fluid connections of the suction jet pumps are connected to feed units 2, 3 arranged in surge chambers 9, 10.

8. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Sinz (US Patent 6276342) in view of Coha (US Patent 6553973) further in view of Fischerkeller (US Patent 5797377).

9. Sinz fails to disclose jet pumps connected to a return line returning fuel from an internal combustion engine into the fuel tank. Fischerkeller (fig. 1) teaches a saddle fuel tank having a jet pump 31 connected to a return line 27 returning fuel from an internal combustion engine into the fuel tank. It would have been obvious to a person having ordinary skill in the art at the time of the invention to have provided the fuel system disclosed by Sinz with a jet pump connected to a return line from engine as taught by Fischerkeller in order to utilize the fuel returning from the engine to balance the fuel level in the fuel tank.

Response to Arguments

10. Applicant's arguments with respect to claims have been considered but are not persuasive since Sinz discloses the fuel jet pumps at a minimum designated height in the tanks and it have been obvious that when placed inside the surge tanks the suction inlet of the jet pumps would be at a designated minimum height in the surge tanks and the jet pumps would inherently stop pumping fluid when the filling level drops below the suction inlet of the jet pump.

Conclusion

11. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ATIF H. CHAUDRY whose telephone number is

Art Unit: 3753

(571)270-3768. The examiner can normally be reached on Mon-Fri Alternate Friday off 9-5 EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robin Evans can be reached on (571)272-4777. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
